

HOPEFUL HINT ENDS BERMUDA SESSIONS

**Communique Says 'Substantial
Number' of Refugees May
Obtain Relief as Result**

SPECIFIC PLANS A SECRET

**Recommendations Adopted Had
to Stand 2 Tests of War-
time Practicability**

Special Cable to THE NEW YORK TIMES.

HAMILTON, Bermuda, April 29

—“A number of concrete recommendations” that “it is felt will lead to the relief of a substantial number of refugees of all races and nationalities” have been made by the Anglo-American delegations to the refugee conference that closed this morning. The delegates signed their joint report in the presence of Acting Governor William L. Murphy.

As expected, a brief statement was issued in behalf of the two groups at the formal closing. The communiqué did not reveal any details of the recommendations, but stressed that each recommendation had had to pass two tests:

First, would the recommendation interfere with or delay the war effort; second, was it capable of accomplishment under war conditions?

The text of the joint statement follows:

The United States and United Kingdom delegations examined the refugee problem in all its aspects, including the position of those potential refugees who are still in the grip of Axis powers without any immediate prospect of escape.

Nothing was excluded from their analysis and everything that held out any possibility, however remote, of solution of the problem was carefully investigated and thoroughly discussed.

From the outset it was realized that any recommendation that the delegates could make to their governments must pass two tests:

Would any recommendation submitted interfere with or delay the war effort of the United Nations, and was the recommendation capable of accomplishment under war conditions?

The delegates at Bermuda felt bound to reject certain proposals which were not capable of meeting these tests.

The delegates were able to agree on a number of concrete recommendations which they are jointly submitting to their governments and which it is felt will meet the tests set forth above.
