

produced gun-carriage wheels from Greisheim electro-metals, until, at the time of the Anschluss, its output was 500 tons per year. During 1938, Farben electron metals were to be used far more than any other metals by all three branches of the Wehrmacht: the Air Force, The Army and The Navy - - for heavy trucks, caissons, airplane wheels and ships' motors.

RANDOLPH NEWMAN CONTINUED HIS CROSS EXAMINATION:

Now, Defendant Haefliger, Austria was occupied by German troops at daybreak on the 12th of March 1938. Several days before the 12th, did you inform your colleague, Mayer-Kuester, in Paris to leave Paris too soon rather than too late, because war might come if Hitler used force against both Austria and Czechoslovakia at the same time?

"I do not remember this letter. It is obvious that the political tension at the time, after Schuschnigg had called off the plebescite, was very great. Those were assumptions on my part."

"You did act on your assumptions, did you not?"

"Beg your pardon?"

"You acted on your so-called assumptions?"

"Of course, just assumptions."

The "political tension" of those few days had prompted the Commercial Committee to what later was called the "Anschluss Meeting," though the men gathered the day before the German troops crossed the border. The year before, the Commercial Committee had come to Berlin from Frankfurt, but Farben had grown so fast that the Frankfurt headquarters was not large enough anymore. Haefliger had been appointed to make suggestions on enlarging the Frankfurt headquarters. But instead, at this meeting, he suggested that the Frankfurt be moved, lock, stock and barrel, to Berlin.

"I know I recommended the idea, and I know that Dr.

Ilgner welcomed the suggestion and that he wanted to cooperate. He said:

"All right, present your arguments. Tell us what reasons there are for
