

SINGLE-SPACE DOUBLE BETWEEN
DOUBLE INO PARS.

the love of one's Mother, enduring no matter how long one stayed away from home. ^{PF} I continued to act as a language expert in the heavy-chemical sector, that very modest part of Farben's work. As a Swiss, I belonged to a very peace-loving nation imbued with the spirit of international understanding.

I just felt the resistance. It was in the air. I could feel it in the attitude of certain associates who are not here in the dock. I could feel that something was up. The regulations against foreigners were becoming intensified; there were certain prohibitions against disclosing secret information; and it is generally known that secrecy became an epidemic. This brought it about that certain of my colleagues became more reticent in giving me information. I have seen that in Nurnberg, from documents - - orders and deliveries which had to be met in case of war.

I never saw these documents and I did not know anything about them. They were of course stamped "SECRET", and I could not have learned about them anyhow, but, as I say, these regulations existed. And all of my associates, who all had their enemies, were hampered in their business with me.

He'd had only hints of what was going on. He was an expert on magnesium, magnesium alloys and aluminum, and he knew that expansion in these fields had to be planned according to sales as well as production, but, he said, he'd suffered from men in the plants the same treatment he'd suffered from his fellows on the Vorstand. When in 1936 he went to inspect the Bitterfeld Plant, he learned that Farben was producing incendiary bomb shells, but he was "not informed of the size of the order. During the year before, he had heard that Farben had erected a ~~magnesium~~ magnesium plant at Aken, "a stand-by plant in event of w.r." Dr. Struss, who also visited Aken and Bitterfeld in the summer of
